

I, _____, certify that ammunition components purchased by me on **447 Scrap: Spent Brass Shell Casings, Links & Magazine Clips Online Auction**, Lot # 1, consisting 55 and 75 gallon drums of spent brass shell casings, links and magazine clips. The spent brass shell casings (once fired) weigh approximately 31,978 gross pounds, while the links weigh approximately 5,071 gross pounds and the magazine clips weigh approximately 286 gross pounds. Bentley's received the barrels and reweighed each barrel. The discrepancy in weight was due to water which we tried to drain by poking a hole into the bottom of the barrel. I further acknowledge that I will not be used for the original manufactured purpose. Additionally, I acknowledge live ammunition may be present among the casings and certify that all casings will be processed through an approved popping furnace prior to processing for recovery of its basic material content. *Further, "I fully understand that neither Bentley & Associates, LLC or Bentley's consigner will not be responsible / liable for my failure to follow the terms of this certification."*
